

OFF-SITE CLOUD BACKUP SOLUTIONS

READY FOR YOUR WORST CASE

SAFE

- Secure your data during transport on our cloud servers
- Choose our partner's 448-bit encryption key or request your own private key to encrypt data
- New and changed files automatically backed up every 2 hours, ensuring near real-time copies of your current day's work
- Restore multiple versions of past files
- Backup networked or mapped drives

FAST

- Schedule daily or weekly backups, or let MozyPro automatically backup while your computer is not in use
- Incremental backups save bandwidth and ensure backups are lightning fast
- Control the priority of service by selecting more or less upload bandwidth so higher priority services can run unimpeded

EASY

- Backup both open and locked files
- Simple interface
- Backup sets come pre-built for common file types. Edit existing backup sets or create your own and control what gets backed up
- Compatible with Windows 10, 8.1 and 7 as well as Windows Server 2012 and 2008
- Protect mission-critical data more easily than ever
